*“A legacy of quality
plastic products
since 1978”*

Samba Plastic Industries Co.

Our Company began plastic manufacturing in 1978. Our Goal at that time was to replace the foreign imported plastic products and provide the Jordanian local market with new products and cover its consumers' needs. Due to the high standards we set for our production line; the local market embraced our products very favorably, causing our manufacturing to grow in factory's structure, vision and goals, which made us hold a greater mission and start producing more innovative molds and models.

In 1990, we began the production of plastic chairs and tables under the trade name and trademark “Samba®”. As soon as the first Samba chair was produced, it immediately became a local household brand for reliable plastic products.

Continuity & Goals:

As our company grew, we continued adding new plastic products that were needed for the growing local market demand. At the same time that we added new products, we also monitored our development, aiming to withhold

our trademark reputation in producing top-of-line local plastic products, through enhancing durability by adding innovative material to protect our ready-for-sale products from environmental factors such as sun and weather, especially for products that meant to be designed for outdoor usage.

Our Values:

Quality Assurance

All products that carry the Samba® trademark go through several tests and design studies before introducing it as a new product in the local, regional and global markets; confirming that its competitively reasonable price does not affect its durability, tolerance against sun and weather, and above all its consumer safety.

Product Innovation

Our adapting the continuous design cycle that starts with finding answers through research, design, development and testing; that helped us in introducing our innovative designs that features to meet not only the customer need and preferences but also to stay ahead in the local market and its trends.

In what, we began producing Rattan Garden Furniture which was also received very favorably by the local and regional markets. Our garden furniture produced by “Samba®” fuses functionality, and durability with aesthetics and modern style; thus sustaining the pioneer status of our manufacturing.

In 2016 we adapted the usage of another high-end technology in the field of plastic production called: “GAS ASSISTED INJECTION TECHNOLOGY” that helped us in manufacturing a new line of high-quality plastic products that are luxurious, very durable and yet matches the modern taste of furniture.

Participation in international and local exhibitions

During the past 20 years, our company participated in several local, regional and international fairs and exhibitions in order to remain in touch with new manufacturing technologies, and to open new regional and international markets. Today, we are selling our products through our partner retail stores not only in Jordan, but also in Palestine (West bank and Gaza Stripe), United Arab Emirates, Kingdom of Saudi Arabia, Kuwait, Iraq, Qatar, Lebanon, and Somalia as regional countries in the MENA region, as well as Tanzania, Zambia, New Zealand, Guadeloupe, and Puerto Rico. Attempting to more expansion in the global market and have partners in Russia, the United Kingdom, Europe and the United States of America.

Keeping Pace with the development of customers and market needs

The constant introduction of new plastic products that are labeled with “Samba®” trademark satisfies all tastes and usages as furniture (indoor / outdoor); therefore, in this catalogue you may find a wide variety of models from chairs, tables, sofa sets, cabinets, drawers and storage unit, to environmental solutions such as garbage bins and other household items.

Consumers’ Satisfaction

We believe that customers hold an important role in our manufacturer; not only because we always aim our focus on understanding our costumer’s needs and preferences to provide them with ready-made solutions, also, on understanding other markets to provide them with the unique needs for the new market. Fostering a long-term relationship with our retail partners by delivering exceptional post sale services (assembly guides) and other customer service, timely products delivery, and addressing their feedback and concerns promptly, making our customers another cornerstone in our production design cycle.
